DETAILED ACTION

Drawings

1. The drawings are objected to because in Figs. 3 and 5, all blocks should be functionally labelled. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the "splitting ... transforming the first horizontal ... transforming the first vertical ... combining ... the second video signal" claimed in claim 7 in combination with limitations of claim 1 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

3. The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

Arrangement of the Specification

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

(a) TITLE OF THE INVENTION.

- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) THE NAMES OF THE PARTIES TO A JOINT RESEARCH AGREEMENT.
- (e) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC.
- (f) BACKGROUND OF THE INVENTION.
 - (1) Field of the Invention.
 - (2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (g) BRIEF SUMMARY OF THE INVENTION.
- (h) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).
- (i) DETAILED DESCRIPTION OF THE INVENTION.
- (j) CLAIM OR CLAIMS (commencing on a separate sheet).
- (k) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).
- (l) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A "Sequence Listing" is required on paper if the application discloses a nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if the required "Sequence Listing" is not submitted as an electronic document on compact disc).

There are no headings.

Claim Objections

4. Claim 9 is objected to because of the following informalities: In claim 9, line 3, "7" should be --8--. Appropriate correction is required.

Claim Rejections - 35 USC § 112

5. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claim 7 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the

specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

An embodiment of “splitting ... transforming the first horizontal ... transforming the first vertical ... combining ... the second video signal” as claimed in claim 7 in combination with limitations of claim 1 is not disclosed in the specification. The specification never discloses an embodiment having limitations of claim 1 in combination with limitations of claim 7. Therefore, applicant must clarify the above matter.

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 4 and 8-12 are rejected under 35 U.S.C. 102(b) as being anticipated by DE 2418747A.

As to claims 1, 2 and 4, DE 2418747A discloses the claimed subject matter, the claimed band-splitting the first video signal is met by filters 11, 13 (fig. 6), the claimed transforming the first high-frequent signal is met by the gamma circuit 14 (fig. 6), the claimed transforming the first low-frequent signal is met by the gamma circuit 12 (fig. 6) and the claimed combining is met by the composition D (fig. 6) (see Figs. 6, 7, page 7 line 15-page 8 line 6).

As to claims 8, 10 and 11, DE 2418747A discloses the claimed subject matter, the claimed band-split filter is met by filters 11, 13 (fig. 6), the claimed first pixel value

transformation unit is met by the gamma circuit 14 (fig. 6), the claimed second pixel value transformation unit is met by the gamma circuit 12 (fig. 6) and the claimed combining unit is met by the point D (fig. 6) (see Figs. 1, 6, 7, page 7 line 15-page 8 line 6).

As to claims 9 and 12, the claimed limitations are disclosed by DE 2418747 A (Figs. 1, 6, 7, page 5 lines 11-24, page 7 line 15-page 8 line 6).

Allowable Subject Matter

7. Claims 3, 5 and 6 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

8. Applicant is informed that claims 1, 4 and 8 are also anticipated by JP 2001 024907 and claims 1 and 8 are also anticipated by EP 0605212 and EP 0757477. The examiner did not apply any additional rejections to so as not to be exhaustive and repetitive.

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Stessen (7050114) discloses a picture signal contrast control.

Bell (5162902) shows a non-linear luminance signal processor responsive to average picture level (APL) of displayed image.
